CAREER OBJECTIVE

My professional objective is to obtain a challenging and rewarding work in the software development sector where I can apply my technical know-how and initiative to build new solutions

EDUCATION

GRADUATION : Balasore College of Engineering & Technology | (2019 - 2023)
77% | Computer Science Engineering

INTERMEDIATE : Upendra Nath college,soro | (2017 - 2019)
63% |

SCHOOL : Panchayat high school,kochiakoil | (2014 -2017)
81% |

TECHNICAL SKILLS

✓ KNOWLEDGE IN SELENIUM:-

- Good knowledge on Selenium architecture
- Knowledge in Locators and Synchronization.
- Good understanding on Xpath.
- Well informed in Dropdown Handling, Popups, Frame Handling.
- Basic understanding in Web driver and WebElement.
- Good knowledge in Frameworks and types of Frameworks.
- Good Understanding of Automation Framework(Hybrid/Data Driven/BDD) and Page Object Model.
- Thorough knowledge in Calendar Popup Handlin

✓ KNOWLEDGE IN MANUAL:-

- Good knowledge on SDLC .
- Good knowledge on BugLife cycle.
- Good knowledge on Build process.
- Good in Compatibility testing and Smoke testing.

✓ WEB TECHNOLOGY:-

- Knowledge of HTML forms and validation, such as input types, properties, and form submission .
- Understanding of CSS box model, positioning and Display property.
- Good knowledge on Events in BOM (popup's, timing functions

✓ GOOD IN ORACLE SQL :-

- Excellent in RDBMS Concepts like Data integrity.
- Confident In SQL Commands (DQL,DDL,DML,TCL,DCL) .
- Knowledge of SQL functions and operators for performing calculations.
- Expert On Joins.
- Sound in solving queries using subqueries and correlated queries.

✓ JAVASCRIPT :-

- knowledge of JavaScript fundamentals like variables, functions, keywords, object, operators, control statement.
- having an understanding of BOM(popup's and timing function).
- Understanding of DOM, validation with respect to front-end.
- Understanding of Array and Strings and Hoisting

✓ REACT JS :-

- Basic idea about props , states.
- Good knowledge on creation of components.
- Good knowledge on Routing.
- Have Good knowledge on API's Fetching & axios.
- Basic idea about Hooks and event handaling.
- Knowledge on creating Single Page Applications

✓ JAVA :-

- Profound understanding of Datatype and Variables.
- Clear idea of Features of Java.
- Basic knowledge in Control statements. .
- Clear view of Method, Constructor, Constructor overloading, Class and Object.
- Good grip in Inheritance, Polymorphism, Encapsulation, Abstraction.
- In-depth knowledge in Interface, Abstract class.
- Good grasp in method overloading and method overriding.
- Good knowledge of Strings, StringBuffer, StringBuilder, Arrays.
- Skilled in Exception Handling.
- Strong understanding of Exception Propagation.
- Good grasp in Collections and Map.

✓ ADVANCE JAVA :-

- Understanding of connecting java application with Database using JDBC Drivers.
- Hands on experience on Servlets and JSP.
- Good knowledge of hibernate JPA Framework
- Efficient in performing CRUD operations using SpringBoot frameWork
- Knowledge of configuring Spring application using xml file and annotations.
- Good knowledge of Lombok library.
- Good understanding of generating API Documentation using Swagger
- Good understanding of testing a spring boot application using Postman App.

PROJECTS

✓ **Portfolio Link :** <https://hrushikesh-100.web.app/>

✓ **FreeTree(E-commerce Platform - Full-Stack Development)**

Tech Stack: HTML, CSS, JavaScript, React js, java(SpringBoot), MySql, RESTful APIs

Overview :

Developed a full-stack e-commerce platform using Spring Boot for the backend and React.js for the frontend. The project involved creating RESTful APIs to manage user registration, product management.

Key Responsibilities:

User Management: Implemented user registration, login, and session management functionalities, including secure password handling and session-based login tracking.

Product Search and Management: Developed APIs for searching and managing products based on various criteria such as name, description, and price.

Frontend Integration: Built a responsive React.js frontend to interact with the backend, including user registration, login, and product display features.

Error Handling: Implemented exception handling to manage common issues like product not found and user conflicts during registration.

✓ **OrangeHrm:**

Tech Stack: Selenium, Java, JavaScript.

Overview ;

I developed a Selenium-based test automation framework utilizing Data-Driven Testing (DDT) and TestNG for OrangeHRM. The framework includes comprehensive scripts for testing various features and incorporates a screenshot capture mechanism for any failed test cases. This framework streamlined the testing process, increased reliability, and provided detailed insights into application behavior during test execution.

DECLARATION

I hereby declare that all of the information provided above is true and accurate to the best of my knowledge, and I accept responsibility for the accuracy of the information provided.
